

I'm not robot!

Published on: December 9, 2021 Learn how to make PDF text searchable, selectable, and copy/pastable. If you've wanted to search, select, copy or paste text in a PDF but were unable to, it means that your PDF wasn't searchable. This guide is meant to help you learn how to easily make your PDFs searchable. We've provided a few alternative methods below. What is a Searchable PDF? By "searchable" PDF, we're referring to a PDF document with text that you're able to select, search, copy, and paste. You may have noticed that some PDFs are searchable while others are not. Why Are Some PDFs Not Searchable? To understand why some PDFs have searchable text, while others do not, let's explore the different types of PDFs you may encounter. The 3 Different Types of PDF Files 1. Text-based PDFs: Text-based PDFs are created when saving the document directly as a PDF from a word processor such as Microsoft Word, or similar applications. 2. Image-based PDFs: Image PDFs are created through scanning paper documents, taking photographs, screenshots, and the like. So rather than typed text in the document, it's simply an image of the text. Thus the text won't be searchable, selected, or copy and pasted. 3. OCR PDFs: OCR PDFs are image-based PDFs that have been turned into text-based PDFs. Thus making them fully text-searchable. Optical Character Recognition (OCR) is used to read the image of the text and add a layer of real text on top, thus converting the document to a text-based PDF. Note: In order to perform Optical Character Recognition on a PDF file, you will need special software. However, any PDF that has had OCR performed on it can be read by any PDF reader. How to Find Out if Your PDF is Searchable To figure out if you PDF is searchable or not, open your PDF and try searching or selecting text with your keyboard or mouse. If you can select or highlight text, then your PDF is searchable. If you can't then it means your PDF is not searchable. How to Make a PDF Searchable (Without Adobe) The easiest way to make a PDF searchable without Adobe is with PDF Pro + OCR! It's our affordable All-in-One Adobe alternative, with state-of-the-art OCR and text recognition capabilities. 1. Open your PDF document in PDF Pro. 2. Press the OCR tab. 3. Click Current file. 4. In the dialog box, specify settings (page range, languages, recognition mode) making sure to select Searchable text. 5. Once ready, press Run. Your PDF is now searchable! You can now select, search, copy, paste the text from the PDF. How to Convert a Scanned Paper Document or Image into a Searchable PDF Once again, we'll be using PDF Pro to demonstrate how to easily make scanned documents and images into searchable PDF. We'll provide two methods. Both will provide the same result. Method 1: 1. Open PDF Pro. 2. Click the OCR tab. 3. Press From file. 4. Find, select, and open your scanned document. 5. Select Searchable text in the dialog box. 6. Press Run. Your document is now a searchable PDF! Method 2: 1. Open PDF Pro. 2. Click the Create tab. 3. Press Create from file. 4. Press Add files. 5. Find and select your document or image, then press Open to convert it into a PDF. 6. Press Create. 7. Press the OCR tab. 8. Press Current file. 9. Specify settings, such as Searchable text. 10. Press Run. Your PDF is now a text-searchable PDF. How to Convert a Word Document into a Searchable PDF To convert a Word document to a searchable PDF, we'll take advantage of Microsoft Word's Save As PDF feature: 1. Open the Word document. 2. Click File. 3. Press Save As. 4. Press Browse. 5. Scroll and select PDF. 6. Click Save. To convert a Word document to a searchable PDF without having Word installed: 1. Upload your Word document to Google Drive. 2. Open your document in Google Drive/Google Docs. 3. Go to File, scroll down to Download. 4. Select download as a PDF Document (.pdf). How to Make a PDF Searchable in Adobe Acrobat Please note that you will need a full subscription to Adobe Acrobat Pro DC to be able to make a PDF text-searchable. Adobe Reader will not be enough. Open Adobe Acrobat on your computer. Click Open. Find and select the document you want to make searchable, then click Open. Head to Tools and select Recognize Text. Press PDF Output Style Searchable Image. Then select OK. Can I Make a PDF Searchable with Adobe Acrobat Reader? No, you will need to use PDF software with OCR technology, which Reader does not have. If you need to convert your PDFs to text today, try PDF Pro + OCR, for free. PDF Pro + OCR is our All-in-One PDF converter, creator, editor, OCR, and more. Convert any Microsoft Office program into PDF format, quickly and accurately. We use world-class OCR technology to allow you to easily scan documents to text, convert PDFs to text, and more! Learn how to convert scans or images of documents into searchable, editable PDF files, and adjust the quality of the resulting file. What you'll need Get files Sample files to practice with (ZIP, 11.4 MB) Open the image of your document Open create-searchable.pdf in Acrobat or open a photo of one of your own documents. In the right hand pane, select the Enhance Scans tool. Select Enhance > Camera Image to bring up the Enhance sub menu. Select the correct option from the Content drop down. Auto Detect is the default and works on most scanned documents. Drag the blue dots to frame the part of the page you want to preserve. Align the dots along the edges of the document to fix the skewing and click Enhance Page. In the resulting enhanced image preview, drag the Adjust enhancement level slider left or right to decrease or increase the contrast. When you are done, click Close to return to the main Enhance Scans menu. At this point, you've got an improved image of your document, but you still cannot edit, select, or search the text. Note: Refer to Scan documents to PDF for more details on how you can change the default settings to enhance scanned documents. Select Recognize Text > In This File to invoke the text recognition sub menu. If necessary, click the Language drop-down and choose the appropriate language from the list of options, ranging from Basque to Ukrainian. Click Recognize Text to convert the image to text that can be selected and edited. Once you use the Recognize Text tool to convert your scanned image into a usable PDF file, you can select and search through the text in that file, making it easy to find, modify, and reuse the information from your old paper documents. Select the Find text tool and enter text to search in the Find field. Now that the text is editable, you can choose to replace the text if necessary. Note: You may get a low resolution scan warning indicating that editing the document may not produce the best results. Click Yes to continue and edit the scanned document. Click No to make no further edits to the file. Something went wrong. Wait a moment and try again. Because you can view PDF files on a variety of computers with different settings and software, they are useful for sharing documents with clients, employees and other businesses. However, when the source of a PDF was an image instead of a typed document, the PDF file does not contain searchable text by default. If the source image had a quality of at least 72 dpi, you can use Adobe Acrobat to transform the PDF using the built-in Optical Character Recognition (OCR) feature. This will place a layer of text on top of the image and create a searchable PDF. Launch Adobe Acrobat and open the PDF you want to edit. Click "Tools" in the menu bar and select "Recognize Text." This will open the Recognize Text panel in the right pane. Click "In This File" and select "PDF Output Style Searchable Image" from the text options. Configure the settings based on the number of pages in your PDF and then click "OK." This will place an invisible text layer over the image and create a searchable PDF file. Click "Save" to save the changes to your PDF. If you've ever downloaded a scanned document, you know the frustration that comes with trying to search for specific words and phrases. If you want to quickly find text to read through — say, a certain explosive report that was just released as an unsearchable PDF — you can use Adobe Acrobat Pro's optical character recognition to convert scanned documents into fully editable PDFs with searchable text. Just open up your PDF in Adobe Acrobat, and click on the "Edit PDF" tool on the right-side menu. Depending on how big your file is, it might take a few minutes to fully convert the file. Once it's done, you can hit Ctrl+F to search through the text. When you're ready to export, you can go to File > Save As to save your new editable document. You can go into settings under Scanned Documents on the right-hand menu for more options, like changing the OCR language, choosing system fonts, and making all the pages editable in one go. Note that Adobe Acrobat is different from Adobe Reader, which is a free app that only lets you open and read PDFs. Depending on your Creative Cloud subscription, Adobe Acrobat might come bundled with your apps, or you can subscribe to the app for \$14.99 a month for Windows and Macs. You can always try out its week-long free trial before you commit, though, so happy searching!
